

	Keihin Carolina System Technology, LLC Safety and Environmental Manual Procedures	Procedure: F-SUS-002 Revision - 01
	Energy Policy	Date: 6-Sept-16

Keihin Carolina System Technology (KCST) is committed to improving its Energy performance. Management will involve all associates and provide adequate resources to ensure continual improvement.

The following are the components of the KCST EnMS:

- ❑ Compliance with applicable laws and other energy related requirements and regulations related to energy use and consumption.
- ❑ Continual improvement of the EnMS through the periodic reviews of and setting of energy objectives and targets.
- ❑ The practice of improving energy performance by eliminating or reducing energy consumption including the purchase of energy efficient products, services and design of equipment or building changes, and using alternative methods.
- ❑ Assignment of Management responsibility for the EnMS and ensuring that all persons working for and on behalf of KCST understand their individual responsibilities for acting in accordance with this policy and associated procedures.
- ❑ Making energy data available and providing adequate resources to achieve objectives and targets.
