

## Sustainable Keihin: Vision and Guiding Principles

Sustaining a healthy global environment and being a model of good corporate citizenship are integral to the activities of Keihin Carolina System Technology, LLC. We strive in every aspect of our business to reduce our environmental impact and give back to the community.

### SAVINGS

- LED bulbs retrofit = 68% energy savings
- Air compressor upgrade = 21% energy savings
- Diverting 2,500 wooden pallets annually
- Cardboard recycling = \$3,500/month savings
- Printing conservation = 1,000 reams saved
- Reusable plates = 250 diverted daily
- 67% reduction in hazardous waste shipping

### GOALS

- 25% GHG reductions by 2018
- 50% GHG reductions by 2050
- LEED Existing Building Certification
- ISO 50001 Certification
- Maintain Zero Waste to Landfill Status

**Continuous Improvement:** As a model corporate citizen, we will strive to inspire and support the community through our commitment to continuous improvement in innovation, education, employee engagement and philanthropy.

**Effectiveness:** We will uphold our high production quality and delivery standards for our customers through sustainable practices that support corporate responsibility throughout the supply chain.

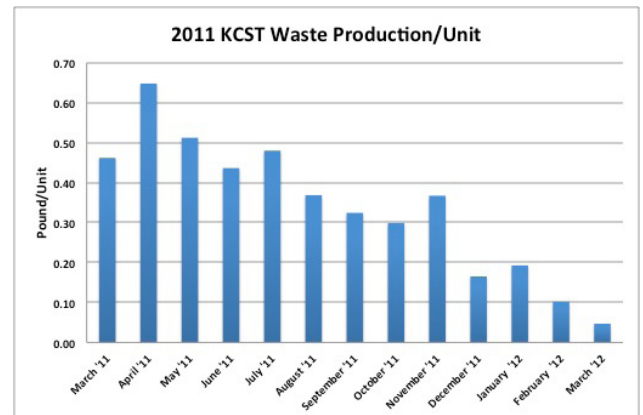

**Supply Chain:** We will strengthen our partnerships with our suppliers to lessen our environmental impact.

**Transparency:** We will maintain our company's appeal by clearly communicating our successes, challenges and establishment of new value to our shareholders.

**Optimal Resource Efficiency:** We will respect natural resources and reduce waste wherever possible, continuing to build the trust of our stakeholders.

## Major Milestones
